Vrinda Store

2022 Sales Data Analysis

Understanding customer behaviour to recommend how to grow sales in 2023

Project overview

Problem statement. Vrinda Store, an online fashion retailer selling ethnic and western wear, wants an annual sales report for 2022. The goal is to find out **who buys, where they live, which age group and which channel drive sales**, so the business can focus its 2023 marketing on the right customers.

₹2.12 Cr	31,047	31,237	92.3%
Total sales (Jan–Dec 2022)	Orders (records)	Units sold	Orders delivered

Approach

The raw order data was cleaned in Microsoft Excel, summarised with Pivot Tables, and visualised with Pivot Charts on an interactive dashboard (with slicers). Each chart in this report answers one business question.

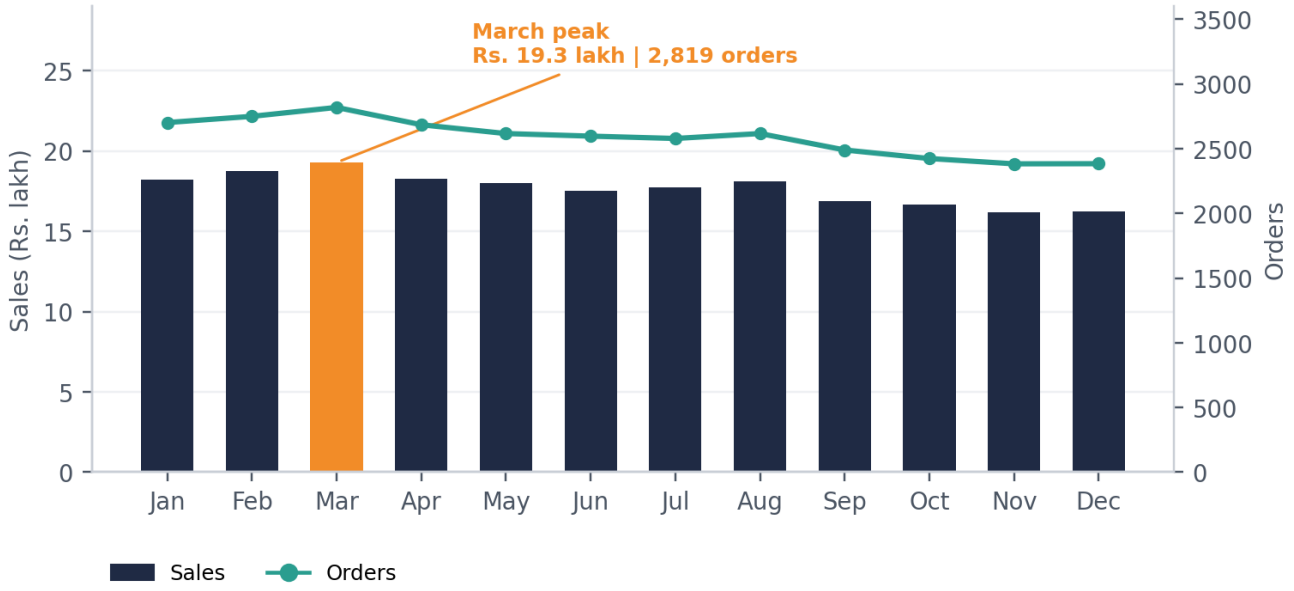

Tool	Microsoft Excel: Pivot Tables, Pivot Charts, Slicers, formulas
Dataset	31,047 order records × 21 columns (Order ID, Date, Gender, Age, Status, Channel, Category, Amount, State, etc.)
Period	January – December 2022
Data prep	Checked for missing values (none found), standardised column formats, and added Age Group and Month columns for analysis
Age groups	Teenager: 18–29 | Adult: 30–49 | Senior: 50 and above

Questions answered

Q1 Compare sales and orders using a single chart
Q2 Which month had the highest sales and orders?
Q3 Who purchased more in 2022: men or women?
Q4 What are the different order statuses in 2022?
Q5 Which are the top 10 states contributing to sales?
Q6 What is the relation between age and gender, based on number of orders?
Q7 Which channel contributes the most to sales?
Q8 Which is the highest-selling category?

Sales and order trends

Q1 & Q2: Compare sales and orders using a single chart. Which month was the highest?

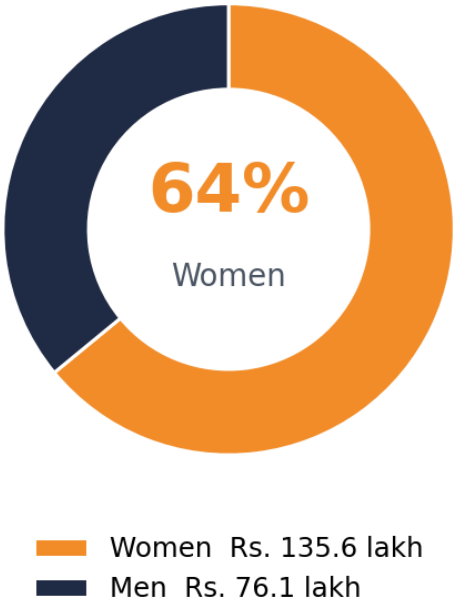

Insight: Sales and orders move together all year. **March is the best month** with ₹19.3 lakh in sales and 2,819 orders. Performance is strongest in Q1, then slips gradually, and the weakest months are **November and December** (about ₹16.2 lakh each). This suggests a need for stronger promotions in the second half of the year.

Customer profile

Who purchased more: men or women?

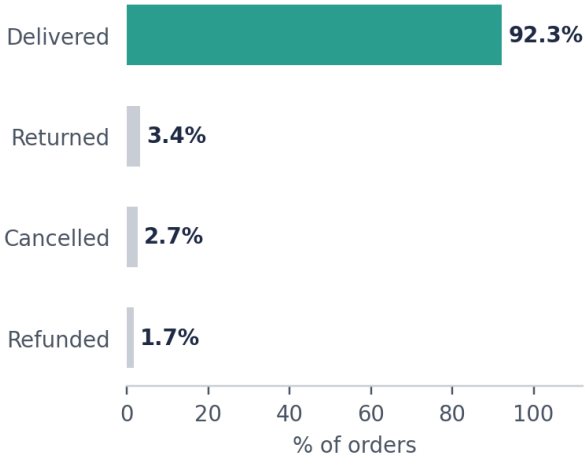

Q3: Share of 2022 sales by gender

Insight: Women generate **64%** of sales (₹1.36 Cr) and place 69% of orders, nearly double the spending of men.

Order status in 2022

Q4: Share of orders by status

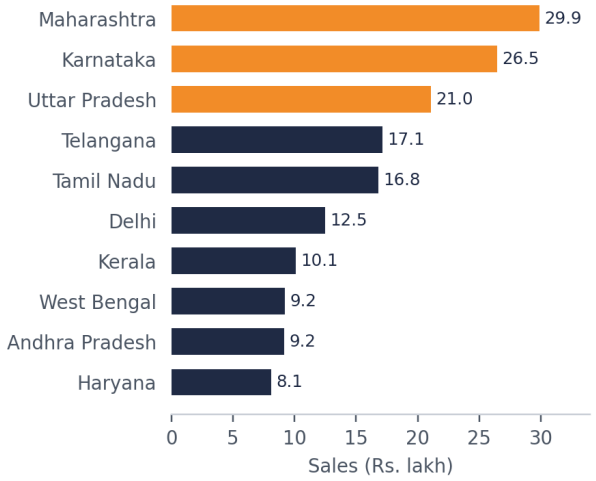

Insight: 92.3% of orders are delivered. Returns, cancellations and refunds together make up only about 7.7%, so fulfilment is healthy.

Where, who and how customers buy

Top 10 states by sales

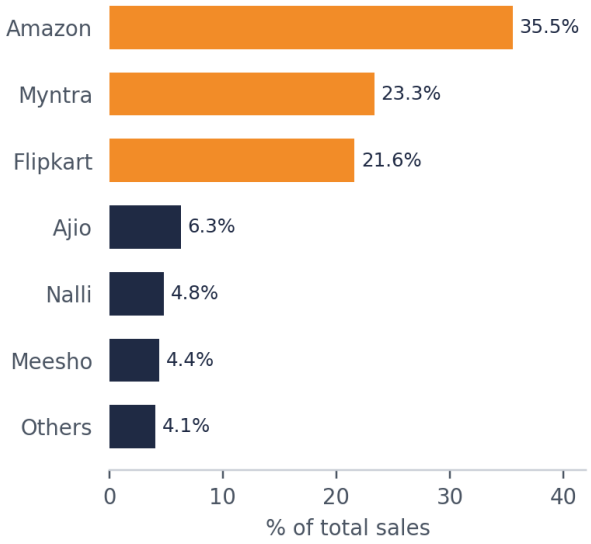

Q5: Sales in ₹ lakh. Top 3 highlighted

Insight: Maharashtra, Karnataka and Uttar Pradesh are the top 3 states and together contribute about **37%** of total sales.

Sales by channel

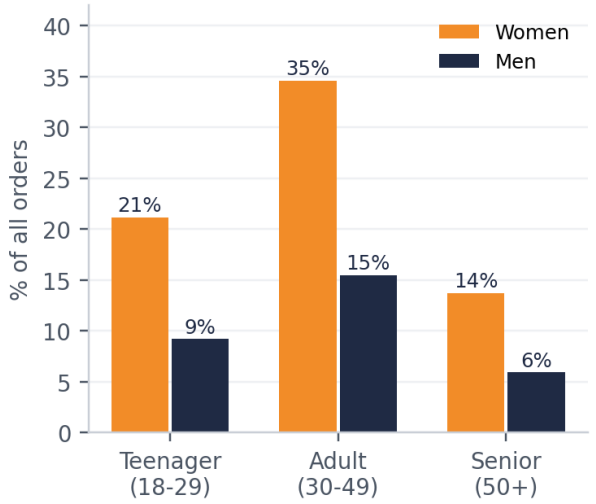

Q7: Share of total sales. Top 3 highlighted

Insight: Amazon, Myntra and Flipkart contribute about **80%** of sales. Amazon alone brings in 35.5%.

Age group and gender

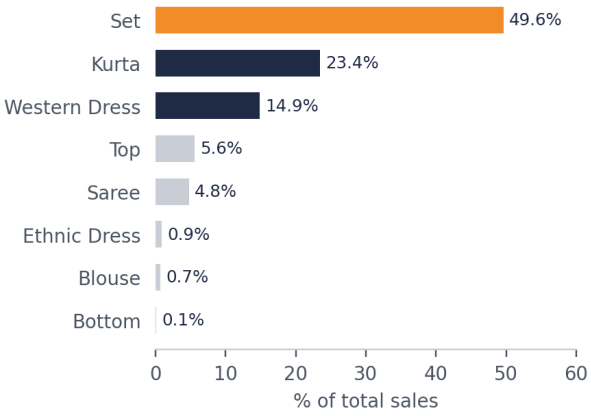

Q6: Share of all orders

Insight: Adults (30–49) are the largest group, placing 50% of orders. Women outnumber men in every age group, and Adult women alone account for about 35% of all orders.

Highest-selling category

Q8: Share of total sales

Insight: Sets are the top category (49.6% of sales), followed by **Kurta** (23.4%) and **Western Dress** (14.9%). These three make up about 88% of sales.

Key insights

Area	Finding	Impact
Gender	Women are more likely to buy than men	64% of sales | 69% of orders
Location	Maharashtra, Karnataka and Uttar Pradesh are the top 3 states	~37% of sales
Age	Adults (30–49 years) are the maximum contributors	~50% of sales
Channel	Amazon, Myntra and Flipkart are the top 3 channels	~80% of sales
Category	Sets, Kurta and Western Dress lead the product mix	~88% of sales
Timing	March is the peak month; sales dip toward year end	₹19.3 lakh in March

FINAL CONCLUSION

To improve Vrinda Store sales, **target women customers aged 30–49 years living in Maharashtra, Karnataka and Uttar Pradesh**, by showing ads, offers and coupons available on **Amazon, Myntra and Flipkart**.

Recommendations

1. **Target the core segment.** Run focused campaigns for women aged 30–49 in the top 3 states, who drive the largest share of revenue.
2. **Concentrate on three channels.** Put the biggest share of ad budget, coupons and offers on Amazon, Myntra and Flipkart, which bring about 80% of sales.
3. **Lead with best-selling products.** Feature Sets, Kurtas and Western Dresses in campaigns.
4. **Lift the second half of the year.** Plan festive and seasonal offers for September to December, when sales are lowest.
5. **Explore growth.** Teenagers (18–29) and Senior customers, and smaller channels such as Ajio and Meesho, are under-served and could be tested with small campaigns.

Notes

• Percentages are calculated from the full 2022 dataset (31,047 records). “Orders” counts order records; 28,471 of them have a unique Order ID.
• Sales are the sum of the Amount column, in Indian Rupees (INR). 1 lakh = 100,000 and 1 crore (Cr) = 10 million.
• Dataset: Vrinda Store practice dataset used for learning purposes. It contains no personal customer names or contact details.
• Full workings, pivot tables and the interactive dashboard are in *data/Vrinda_Store_Data_Analysis.xlsx*.
